¹ Balance sheet figures shown here are sourced from the Federal Reserve. The balance sheets that we use in all other sections of this document are sourced as described in About This Report, Structure and content, Sources of data, Financial statement and related data at the beginning of this report. Because Item 6 requires us to show more years of financial information than elsewhere in this report, the figures that we show here are sourced from the Federal Reserve as this is the only source of which we are aware that provides an extended time series of combined balance sheet data. Key differences in the balance sheets from the two sources are that the Federal Reserve does not appear to include in its data: TARP investments, inventories and related property, investments in GSEs, or land in their assets or environmental and disposal liabilities, benefits due and payable, loan guarantee liabilities, or other liabilities in their liabilities. They also appear to account for Treasury securities, property, plant, and equipment, and employee and veteran benefits payable on different bases.

² To show the financial highlights in "real" terms, we have calculated and reported inflation-adjusted amounts. The inflation adjustment factors are based on the Consumer Price Index – All Urban Consumers (CPI-U) with a baseline year of 2016.
